Networks (ISSN: 0028-3045) is published monthly except in February, April, June, and November, two volumes per year, by John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Copyright © 1995 John Wiley & Sons, Inc. All rights reserved. No part of this publication may be reproduced in any form or by any means, except as permitted under Section 107 or 108 of the 1976 United States Copyright Act, without either the prior written permission of the publisher, or authorization through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, (508) 750-8400, fax (508) 750-4470. Second-class postage paid at New York, NY, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an item in the journal indicate the copyright holder's consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 and 108 of the United States Copyright Law. The per-copy fee for each item is to be paid through the Copyright Clearance Center, Inc.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription price (Volumes 25–26, 1995): $640.00 in US, $720.00 in Canada and Mexico, $750.00 outside North America. All subscriptions outside US will be sent by air. Payment must be made in US dollars drawn on a US bank. Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits. Please allow four weeks for processing a change of address. For subscription inquiries, please call (212) 850-6645; E-mail: SUBINFO@jwiley.com.

Postmaster: Send address changes to *Networks*, Susan Malawski, Director, Subscription Fulfillment and Distribution, John Wiley and Sons, Inc., 605 Third Avenue, New York, NY 10158. For subscription inquiries, please call customer service at (212) 850-6645 or write to the above address.

Advertising Sales: Inquiries concerning advertising should be forwarded to Roberta Frederick, Advertising Sales, John Wiley & Sons, 605 Third Avenue, New York 10158, (212) 850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO19 IUD, England.

Reprints: Reprint sales and inquiries should be directed to the Customer Service Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. Tel: (212) 850-8776.

Manuscripts should be submitted to the Managing Editor, Professor C. L. Suffel, Department of Mathematics, Stevens Institute of Technology, Hoboken, NJ 07030. **Information for contributors** appears in the first and last issue of each volume. **All other correspondence** should be addressed to: *Networks*, Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

The contents of this journal are indexed in the following: *Compumath Citation Index, Computers and Control Abstracts, Computing Reviews, Current Contents / Engineering Technology and Applied Sciences, Electrical and Electronic Abstracts, Mathematical Reviews, Research Alert (ISI), Science Citation Index (ISI), and SCISEARCH Database (ISI).*

Editorial Production, John Wiley

This journal is printed on acid free paper.

Subject Index to Volume 26, 1995

Adaptive discretization algorithm, 1
Assignment Problem, intractability, 165

Binary cube, 87
Bipartite regular graphs, with fixed diameter, 139
Block-angular convex programs, exponential potential-function reduction algorithm, 59
Boolean *n*-cube, 87
Bottleneck Steiner distance, 187
Bradcasting, antepenultimate, 125
Branch and bound procedure, minimum spanning tree problem, 231
Branch-and-cut algorithms, 173
Broadcast protocol, 125
Broadcasting
  all-to-all, 13
  binary cube architecture, 87
  concurrent, 13
  multiple message, 253
Bucky-ball rule, 273
Butterfly graphs, Hamilton cycles and paths, 145

Causal model, 217
Chromosome, 151
CM FORTRAN, 69
Cocomparability graphs, feedback vertex set, 101
Communication spanning tree problem, using genetic algorithms, 151
Communications network
  multiple message broadcasting, 253
  repeated uncoordinated information dissemination by flooding, 13
  upgrading problems, 45
Conditional probability matrix, evolution, 217
Configurations, optimal, 273
Connections, helical and straight, 87
Constrained shortest path problems, 263
Continuous network programs, adaptive discretization algorithm, 1
Continuous-time minimum-cost network flow problems, 1
Crossover operator, 173

Dag vertex upgrade problem, 45
Decoder, 173
Decomposition, restricted simplicial, with side constraints, 199
Delivery and backhaul, 243
Digital cross-connect system, 263
Dijkstra-like algorithm, 263
Dynamic programming approach, 263

Embedding, helical cube, 87
Euclidean Steiner tree problem, 187
Euler method, massively parallel implementation, 69
Exponential potential-function reduction algorithm, block-angular convex programs, 59

Facet-defining inequalities, symmetric Generalized Traveling Salesman Problem, 113
Fault-tolerant VLSI systems, 217
Feedback vertex set, cocomparability graphs, 101
Fitness function, 151
Flooding, repeated uncoordinated information dissemination, 13

Generalized Minimum Spanning Tree Problem, 231
Generalized Traveling Salesman Problem, symmetric, 113
Genetic algorithms
  network design, optimal communication spanning tree problem, 151
  Steiner Problem in a Graph, 173
Genotype, 173
Goldman's algorithm, 305
Grandfather-connected-tree, 217
Graphs
  bipartite regular, with fixed diameter, 139
  butterfly, Hamilton cycles and paths, 145
  cocomparability, feedback vertex set, 101
  complete, broadcasting, 253
  reductions, 173
  vertex-transitive, 145
  with wieghts and delays, 45

Hamilton cycles and paths, butterfly graphs, 145
Helical cube network, 87
Heuristic procedure, minimum spanning tree problem, 231
Hypercube, broadcasting, 253
Hypercube network, 87

Information dissemination, repeated uncoordinated, flooding, 13
Inversion operator, 173

k-way splits, 125
Kou, Markowsky, and Berman heuristic, iterated version, 173

Ladder-based reductions, 187
Link-deletion method, 305
LinkDelay, 45
Longest path, 45
Lower bounding procedure, minimum spanning tree problem, 231

Meshes, embedding in helical cube, 87
Messages, multiple, broadcasting, 253
MIMD, 69
Minimal spanning tree, 273
  generalized problem, 231
Minisum-location problem, 305
Mutation operator, 173

Network design, optimal communication spanning tree problem, genetic algorithms, 151
Network reliability problems, 217
Nodes, at most *l*, shortest path, 263

$O(N^2)$ heuristic
  2-median computation on tree networks, 305
  Steiner minimal trees in E^3, 273
Optimization problem, parametric, 59

p-median problem, 305
Packet-switching, reliable, 165
Period vehicle routing problem, heuristic, 25
Pickup Delivery Location Problem, 243
Polygon-encoding, shortest paths, 291
Price formulation, spatial network equilibria, 69
Probabilistic model, 217
Projected dynamical systems modeling, 69
Prüfer numbers, 151

Quantity formulation, spatial network equilibria, 69

Rectilinear Steiner minimal tree, 187
Rectilinear Steiner Problem, 173
Rectilinear Steiner Tree Problem, reductions, 187
Reduction operators, 151
Reliability
  analysis, tree-based networks, 217
  helical cube, 87
  residual network, 165
Reliable assignment problem intractability, split networks, 165
Residual network reliability, 165
Residual node connectedness network reliability model, 165
Restricted simplicial decomposition, with side constraints, 199
$\rho_3(2)$ phenomenon, decreasing, 273
Ribbon decomposition problem, 273
Rings, embedding in helical cube, 87
Routing, helical cube, 87

Satellite, 45
SCRSD algorithm, 199
2-Semipartition Problem, 165
Shortest path
  constrained problems, 263
  encoding, spatial networks, 291
  network upgrading, 45
Signal flow networks, upgrading problems, 45
Simchi-Levi and Berman Traveling Salesman Location Problem, heuristic, 243
SIMD, 69
Spatial networks
  encoding shortest paths, 291
  equilibria computation, 69
  geometric properties, 291
Split networks, reliable assignment problem intractability, 165
Star reductions, 187
Steiner minimal trees, in E^3, $O(N^2)$ heuristic, 273
Steiner Problem in a Graph, near-optimal solutions, 173
Steiner tree problem, rectilinear, 187
Strictly feasible point, 59
Subtrees, 1-median, 305

Takahashi and Matsuyama heuristic, iterated version, 173
Traveling Salesman Location Problem, Pickup Delivery Location Problem, 243
Traveling Salesman Problem, symmetric generalized, 113
Tree-based networks, reliability analysis, 217
Trees
  broadcasting, 253
  2-median computation, $O(N^2)$, 305

Vehicle Routing Problem, period, heuristic, 25
VLSI systems, fault-tolerant, 217
Voronoi polyhedra, 273
